

IMPORTANT REQUEST FROM YOUR WATER SUPPLIER

Dear Water Customer,

The Environmental Protection Agency (EPA) recently announced changes to drinking water regulations requiring water suppliers to identify all materials used in the construction of the water system. The goal of these changes is to identify and remove all lead pipes in the drinking water system. The water supplier must identify all construction materials used on both the supplier's AND the customer's side of the water meter, which means we will need your help!

The Kansas Department of Health and Environment (KDHE) is mandating water suppliers to submit the completed information before October 16, 2024. If the required information cannot be gathered from the homeowner, KDHE may require the water supplier to excavate private lines to identify them. This would be time-consuming, expensive, and damaging to the customer's lawn and landscaping. To avoid this, we need your help to complete this requirement. Please complete the survey below and return it to us **AS SOON AS POSSIBLE** to one of the options below.

Mail to:
